Location: 24.0 nm SW of the complex support facility

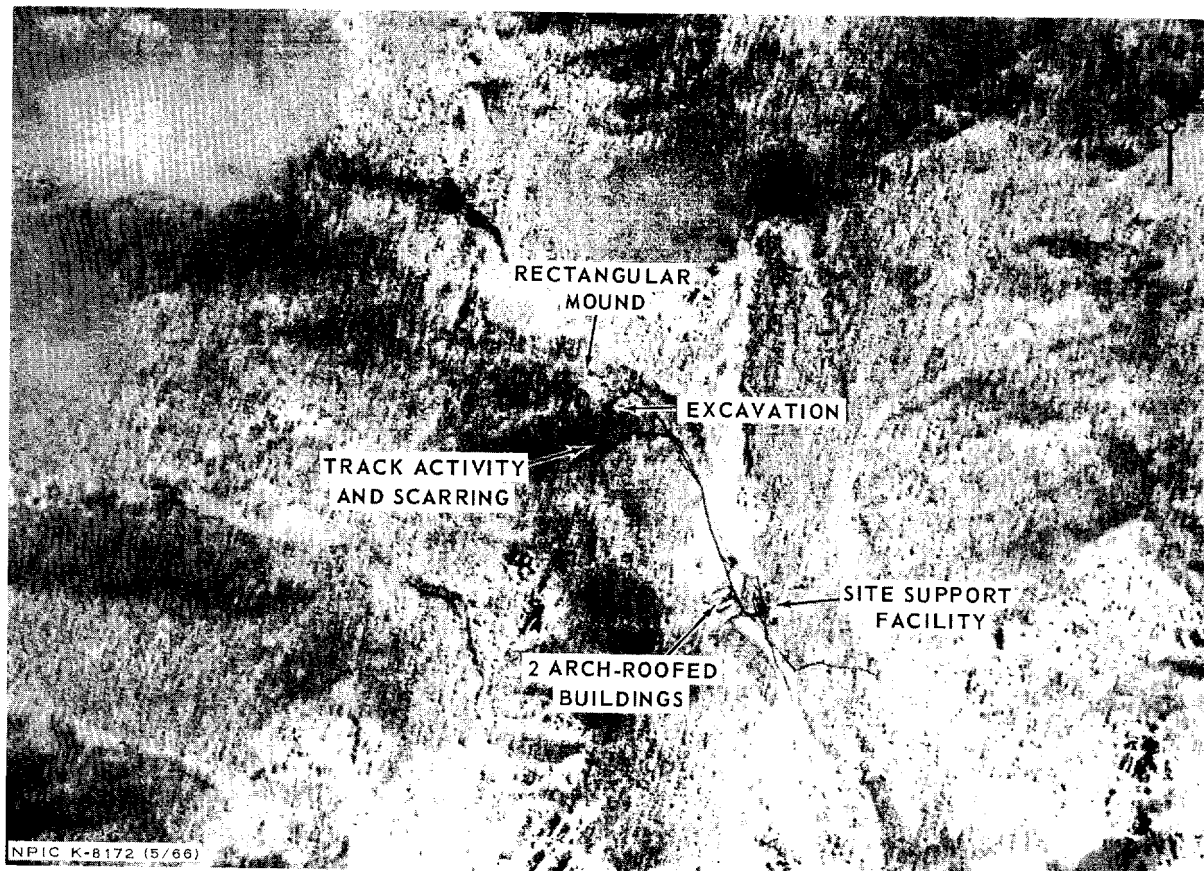

Type: IIIC

Negation Date

Stage of Construction: Undetermined

Date First Seen:

The launch site contains a silo excavation with a rectangular mound on the NW side. No security fencing can be observed because of snow cover. The track activity and scarring SW of the excavation and the 2 long arch-roofed buildings adjacent to the site support facility suggest a probable L-shaped electronics facility under construction. The site support facility contains several small buildings and is connected to the launch site by track activity.
